# Inflammation, Lifestyle And Chronic Diseases: The Silent Link (Oxidative Stress And Disease)

## Synopsis

Oxidative stress and inflammation are among the most important factors of disease. Chronic infections, obesity, alcohol and tobacco usage, radiation, environmental pollutants, and high-calorie diets have been recognized as major risk factors for a variety of chronic diseases from cancer to metabolic diseases. All these risk factors are linked to chronic diseases through inflammation. While short-term, acute inflammation generated by the immune system serves a therapeutic role, chronic low-level inflammation that may persist "silently" for decades is responsible for chronic diseases. *Inflammation, Lifestyle, and Chronic Diseases: The Silent Link* describes the role of dysregulated inflammation in persistent and recurring diseases. It investigates links to lifestyle and presents research on how the suppression of proinflammatory pathways may provide opportunities for both prevention and treatment of chronic diseases. The book covers neurodegenerative diseases, pulmonary diseases, asthma, rheumatic and arthritic diseases, skin disease, heart disease, chronic wounds, infectious disease, neuropsychiatric disorders such as depression, gastrointestinal diseases, insulin resistance, and cancer, many of which are also diseases of old age. For each chronic disease, contributors review the clinical and scientific literature and examine current and potential therapies, including conventional pharmacotherapies as well as natural products. Noting that the long-term use of steroids and nonsteroidal anti-inflammatory drugs (NSAIDs) can cause adverse side effects, many of the chapters address the role of dietary agents such as fruits, vegetables, legumes, pulses, nuts, and spices as ideal anti-inflammatory agents that can be consumed regularly. The book also suggests directions for further research. Clinical and science researchers, students, and health professionals interested in the link between inflammation, lifestyle, and chronic diseases will find this an informative resource.

## Book Information

File Size: 36228 KB

Print Length: 504 pages

Publisher: CRC Press; 1 edition (April 19, 2016)

Publication Date: April 19, 2016

Sold by: Digital Services LLC

Language: English

ASIN: B009SD0WMQ

## Customer Reviews

textbook for class, not really a good text, it was more like a collection of published literature. Not for learning a subject. Probably a good reference book for someone already familiar with the topic.

Even more unmistakable than the failure of traditional medicine to institutea preventive medicine, is the clear message in Aggarwal - Krishnan-Guha 's book thatdescribes inflammatory causes of disease. perhaps the point of this extensive scholarlywork is that an anti-disease lifestyle must be fine-tuned for disease prevention and treatment.A sattvic lifestyle must be a beginning.

thank you!
