As a playwright, German classic Kleist sits on top of the Olymp, right up there with Goethe and Schiller. He also left a relatively small prose oeuvre behind when he died at 34 (in a suicide pact). An unpublished 2 volume novel is said to have disappeared. What we have is this bunch of stories and some journalism, and letters. He is a classic, but he was no classicist (hence no boredom like eg Goethe's Elective Affinities), and also no romantic. He belonged to no school but his own. His stories take us into worlds of madness. Passions and restrictive social norms collide and cause
endless havoc. A frequent motive is what we would call 'honor killings' nowadays: people, usually women, subjected to the extreme punishment for inappropriate relations. The title story itself (set in Napoleonic times in Italy) is not quite as extreme in this regard: the Marquise 'only' gets expelled from her parents' home and ostracized, because she does not know how she got pregnant. Hard to believe, admittedly. Hardship steels her character and she attacks: she publishes an ad asking for the father to step up, she would forgive him and marry him. When he turns up it is a man whom she had had a crush on, a Russian count and officer who had saved her from rapists during the war, and had found her fainted. Well, well. Since he had been her angel, now he becomes her devil. But all in all, this is a comparatively sane story, as far as the protagonists go. There is Kohlhaas, the horse trader who becomes a rebel and outlaw in protest against some junkers mistreating his horses and his servant. In a very German solution, he finds justice for the horses, but also for his crimes. Blind justice with her scale works both ways.
